## Methodology \& Logistics

## Overview

The following represents the results of a September 2020 national omnibus telephone survey of $\mathrm{N}=2000$ Canadian residents, 18 years of age or older, conducted by Oraclepoll Research Ltd.

The results contained in this report are from the fourteen (14) questions subscribed to by Friends of the Earth on issues related to climate change in a Covid 19 world.

## Study Sample \& Error Rates

A total of $\mathrm{N}=2000$ interviews were completed, with residents across Canada. All respondents were screened to ensure that they were residents of Canada and they were 18 years of age or older. Adjacent is a breakdown of the total sample by area or region.

| Atlantic | $\mathrm{N}=140$ | $7 \%$ |
| :--- | :--- | :--- |
| Ontario | $\mathrm{N}=760$ | $38 \%$ |
| Quebec | $\mathrm{N}=460$ | $23 \%$ |
| Man / Sask | $\mathrm{N}=141$ | $7 \%$ |
| Alberta | $\mathrm{N}=240$ | $12 \%$ |
| BC | $\mathrm{N}=259$ | $13 \%$ |
| TOTAL | $\mathrm{N}=\mathbf{2 0 0 0}$ | $\mathbf{1 0 0 \%}$ |

The margin of error for the total $\mathrm{N}=2000$ sample is $\pm 2.1 \%, \frac{19}{20}$ times. The error rate for each of the female $(\mathrm{N}=1039)$ and male ( $\mathrm{N}=961$ ) breakouts reported is $\pm 3.0 \%$ and $\pm 3.2 \%, \frac{19}{20}$ times, respectively.

## Survey Method

All surveys were conducted by telephone using live operators at the Oraclepoll call center facility using computer-assisted techniques of telephone interviewing (CATI) and random number selection (RDD). Twenty percent of interviews were monitored and the management of Oraclepoll Research Limited supervised 100\%. The dual sample frame random database was inclusive of landline and cellular telephone numbers.

## Logistics

Interviews were completed between the days of September $1^{\text {st }}$ and September $12^{\text {th }}, 2020$.
Initial calls were made between the hours of 5 p.m. and 9 p.m. Subsequent call backs of noanswers and busy numbers were made on a (staggered) daily rotating basis up to 5 times (from 10 a.m. to 9 p.m. within each time zone) until contact was made. In addition, telephone interview appointments were attempted with those respondents unable to complete the survey at the time of contact.

## Most Important Issue

In an open-ended unaided question, respondents were first asked what they considered to be the most important issue that will have long term consequences impacting future generations.

Q1. "What do you think is the most important issue of our time that will have long term consequences impacting future generations?"

|  |  | Male | Female | TOTAL |
| :---: | :---: | :---: | :---: | :---: |
|  | Covid 19 / pandemic | 36\% | 35\% | 35\% |
|  | Climate change | 22\% | 34\% | 28\% |
|  | Deficits / spending / debt | 11\% | 8\% | 9\% |
|  | Economy / jobs / employment | 12\% | 7\% | 9\% |
|  | Health care / mental health | 5\% | 6\% | 6\% |
|  | Unsure | 8\% | 3\% | 6\% |
|  | Poverty / rising cost of living | 3\% | 4\% | 4\% |
|  | Social justice issues | 1\% | 2\% | 1\% |
|  | Opioid crisis | <1\% | 1\% | 1\% |
|  | Water pollution | <1\% | <1\% | <1\% |
|  | Loss of wilderness / species | <1\% | <1\% | <1\% |
|  | Deforestation / habitat loss | <1\% | <1\% | <1\% |

The Covid 19 pandemic is seen as the most important current issue (35\%) that will impact future generations by an almost equal number of males and females. Climate change followed closely at $28 \%$, with $+12 \%$ more females (34\%) recalling the issue in relation to males (22\%). Economic concerns including deficits (9\%) and the economy (12\%) as well as health care (6\%) rounded out the top five - with males tending to have a higher recall of economic issues.

## Climate Disasters

Respondents were then asked two questions about climate disasters. The first probed if they have experienced an extreme weather event and the second about their concern about climate change and the threat of potential climate disasters.

> Q2. "Have you experienced or lived through an environmental, extreme weather or climate related disaster?"

Forty six percent claimed they have experienced or lived through an environmental, extreme weather or climate disaster, with slightly more females (47\%) than males (44\%) saying they have.

Residents of Atlantic Canada had the highest response of yes (77\%), followed by Manitoba/Saskatchewan (58\%) and Alberta (52\%). A lesser 47\% of Quebec respondents have experienced such an event, as have $42 \%$ from BC and $36 \%$ from Ontario.

More than eight in ten or $81 \%$ are concerned (35\%) or very concerned (46\%) about climate change and the threat of potential climate disasters. Only $10 \%$ are not concerned (6\%) or not at all concerned ( $8 \%$ ) and $5 \%$ held a neutral view being neither concerned nor unconcerned.

More females or 85\% are concerned in comparison to males at $75 \%$. In addition, younger Canadians 18-34 (89\%) are most concerned followed by 35-64-year old's (79\%), in relation to those older 65+ (70\%).

## Covid 19 \& Work Arrangements

Two questions about pre and post Covid 19 working arrangements were asked. If respondents said they currently work at a location other than their home ( $39 \%, \mathrm{~N}=772$ ), a series of four supplemental probes followed (Q5 - Q8).

| PRE-COVID <br> WORK <br> LOCATION |
| :---: |
| Male <br> pay, at a location other than at your home or not <br> working?" |

| CURRENT <br> WORK <br> LOCATION <br>  <br>  <br> Male$\quad$Q4b. "And currently, do you work for pay at home, <br> at a location other than your home or are you not <br> working?" |
| :---: |
| Female |
| Total |

Q5. "Approximately how many kilometers is it <one way> from your home to your work destination?"

| Under 5 | $21 \%$ |
| :--- | :--- |
| $6-10$ | $38 \%$ |
| $11-20$ | $18 \%$ |
| $21-30$ | $9 \%$ |
| 30 or more | $14 \%$ |

Pre-Covid, most people and a higher percentage of males (+6\%) worked from places other than home, with only 7\% working at their domicile. More or +6\% more females than males were not working (the not working percentage shown includes retirees).

In post-Covid early September 2020, the number of those working at home was $+25 \%$ higher at $32 \%$. In this period more males are working away from home and the not working number is also $+6 \%$ higher.

The 6-10-kilometer range for a one-way trip to work was most referenced (38\%), followed by less than five (21\%) and 11-20 (18\%), while almost one-quarter named distances of 21 kilometers of more. Among those travelling to a work location, there was no significant difference among genders.

## Covid 19 \& Transportation

The $39 \%, \mathrm{~N}=772$ that said they currently work at a location other than their home in Q4b were questioned about the method of transportation they used pre Covid 19 and what they use now.

| most often use to commute to work? |  |  |  |
| :---: | :---: | :---: | :---: |
|  | Male | Female | TOTAL |
| Personal vehicle | 78\% | 65\% | 72\% |
| Public transit | 9\% | 18\% | 13\% |
| Ride sharing | 9\% | 8\% | 9\% |
| Walking | 3\% | 7\% | 5\% |
| Bicycle | 1\% | 2\% | 1\% |

Q7. After COVID 19 and currently, what method of transportation do you

| most often use to commute to work? |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- |
|  | Male | Female | TOTAL |  |
| Personal vehicle | $85 \%$ | $70 \%$ | $78 \%$ |  |
| Public transit | $6 \%$ | $13 \%$ | $9 \%$ |  |
| Walking | $4 \%$ | $9 \%$ | $7 \%$ |  |
| Ride sharing | $4 \%$ | $5 \%$ | $4 \%$ |  |
| Bicycle | $1 \%$ | $3 \%$ | $2 \%$ |  |

Pre-Covid, personal vehicles were the preferred choice of a $72 \%$ majority of all respondents and among a higher number of males ( $78 \%$ ) compared to females (65\%). Public transit followed at 13\% and by a 2 to 1 margin it was the method most often used by females. Ride sharing followed with no gender split and then walking which was the choice of more than twice as many more females.

Currently, +6\% more people are driving, while transit numbers have dropped $-4 \%$ as has ride sharing (-5\%). There was a slight uptick in the number of walkers (+2\%) and cyclists (+1\%).

There were $\mathrm{N}=61$ respondents or $8 \%$ that changed the way they commute to work as identified by the different responses in Q7 in relation to Q6. The $N=61$, were then asked a follow-up question about the main reason why they have made this change.

| Q8. Can you tell me why you have changed the way that you commute to |
| :--- |
| $\qquad$work? |
| COVID-19 health risk |
| Change of job |

With more people driving and less taking transit or ride sharing, the main reason provided by $82 \%$ was Covid 19 and the health risks associated with it.

## Local Access

All $\mathrm{N}=2000$ respondents were then asked in an open probe allowing for up to three responses to name the most important locations, facilities, or services they need to get to regularly. Below are the combined results from the $\mathrm{N}=3517$ mentions provided.

Q9. "What are the most important locations, facilities, or services that you need to travel or commute to on a regular basis?"

|  |  | Male | Female | TOTAL |
| :--- | :--- | :--- | :--- | :--- |
|  | Grocery stores | $39 \%$ | $41 \%$ | $40 \%$ |
|  | Work/office/facility | $26 \%$ | $19 \%$ | $22 \%$ |
|  | Schools | $10 \%$ | $13 \%$ | $12 \%$ |
|  | Sports/recreational facilities | $11 \%$ | $8 \%$ | $9 \%$ |
|  | Childcare facility | $4 \%$ | $10 \%$ | $7 \%$ |
| Other commercial stores | $5 \%$ | $4 \%$ | $5 \%$ |  |
| Health \& long-term care facilities | $3 \%$ | $3 \%$ |  |  |
| Green spaces/parks | $1 \%$ | $2 \%$ | $3 \%$ |  |
| Place of worship | $<1 \%$ | $<1 \%$ | $2 \%$ |  |

Grocery stores were most recalled by an almost equal number of males and females, next by work which was named by $+7 \%$ more men compared to women. Schools, sports or recreational facilities and childcare centres followed with females tending to travel more to schools and childcare's and males to recreational amenities. Other stores, health care related facilities and parks were lesser cited with no significant gender variances.

## Climate

In another open question, all survey participants ( $\mathrm{N}=2000$ ) were asked to consider what the federal government could do to reduce climate impact and then name what would be most important to them.

Q10. "When you consider how the federal government could act to reduce climate impact, what would be most important to you?"

|  | Male | Female | TOTAL |
| :--- | :--- | :--- | :--- | :--- |
| Regulations to reduce greenhouse gas emissions | $30 \%$ | $37 \%$ | $33 \%$ |
| Financial incentives to help make household more efficient (furnace \& air) | $15 \%$ | $16 \%$ | $16 \%$ |
| Financial incentives to help purchase more efficient appliances | $15 \%$ | $12 \%$ | $13 \%$ |
| Support for cleaner vehicles and fuel | $12 \%$ | $12 \%$ | $12 \%$ |
| Unsure | $13 \%$ | $10 \%$ | $11 \%$ |
| Support to design and produce clean technology | $10 \%$ | $10 \%$ | $10 \%$ |
| None / not needed | $5 \%$ | $<1 \%$ | $3 \%$ |
| Support for more local farmers' markets and more local food stores | $1 \%$ | $1 \%$ | $1 \%$ |
| Support for childcare in my neighbourhood | $<1 \%$ | $1 \%$ | $1 \%$ |
| Support for eldercare in my neighbourhood | $\lll$ | $<1 \%$ | $<1 \%$ |
| Help restaurants and food stores reduce plastic packaging and other waste | $<1 \%$ | $<1 \%$ | $<1 \%$ |

Most important to one third of all respondents was to have the federal government implement regulations to reduce greenhouse gas emissions, with more females (37\%) naming this in relation to males (30\%). Then there were almost three in ten that want financial incentives to either make their residence more efficient (16\%) or to be able to purchase energy efficient appliances (13\%). More than two in ten said they want support for cleaner vehicles or fuel (12\%) or support to design and produce clean technology (10\%).

Respondents were first questioned if they were aware of any federal government programs to assist in reducing their climate footprint. Afterwards, in an open-ended probe they were asked in what area or for what purchase government assistance would be most helpful to them to help reduce their climate footprint.

Thirty two percent said they are aware of federal programs to assist in reducing their climate footprint. Males were more likely to be aware at $38 \%$, compared to $26 \%$ of females that were aware.

|  | YES | NO |
| :--- | :---: | :---: |
| Male | $38 \%$ | $62 \%$ |
| Female | $-26 \%$ | $74 \%$ |

Q12. In what area or for what purchase would government assistance be most helpful to you to help reduce your climate footprint or impact?

Most referenced was having assistance to insulate or weatherproof their home at $39 \%$, with more males ( $43 \%$ ) wanting such a program in comparison to females (35\%), next by having a furnace or air conditioning program at $19 \%$ ( $+3 \%$ more males). Help with food or groceries was named by $10 \%$ with $15 \%$ of females naming this in relation to only $5 \%$ of males. Other areas did not have a gender imbalance and included assistance for vehicles, weatherproofing rental units, a fridge/stove program and one for washers/dryers.

In the final two questions, respondents were first asked if they will accept an increase in fossil fuel prices if the federal government provides support to low income families and vulnerable small businesses to offset these increases. They were then asked if they consider themselves to be a climate voter, or a person that casts a ballot on climate issues.

Q13. "Would you accept an increase in fossil fuel energy prices if the federal government provides adequate support to low income families and vulnerable small businesses to offset those increases?"

## Unsure 4\%

Yes 59\%
No 37\%

Fifty nine percent claimed they would be willing to have an increase in fossil fuel prices if the government would in turn provide support to low income families and vulnerable small businesses. While only $49 \%$ of males support this measure, almost seven in ten females or $68 \%$ are in favour.

Q14. "Do you consider yourself a climate voter or someone who votes on issues related to climate change?"

## Yes 42\%

No 58\%

With $42 \%$ of the total sample saying they consider themselves to be a climate voter, results were at half or $50 \%$ for females, but only a third or $33 \%$ for males.

## Results by Question

Q1. What do you think is the most important issue of our time that will have long term consequences impacting future generations?

|  | Frequency | Percent |
| :--- | :---: | :---: |
| Covid 19 / pandemic | 706 | 35.3 |
| Climate change | 563 | 28.2 |
| Deficits / spending / debt | 186 | 9.3 |
| Economy / jobs / | 181 | 9.1 |
| Health care / mental health | 115 | 5.8 |
| Unsure | 115 | 5.8 |
| Poverty / rising cost of living | 70 | 3.5 |
| Social justice issues | 27 | 1.4 |
| Opioid crisis | 16 | .8 |
| Water pollution | 9 | .5 |
| Loss of wilderness | 7 | .4 |
| Deforestation | 5 | .3 |
| Total | 2000 | 100.0 |

Q2.Have you experienced or lived through an environmental, extreme weather or climate related disaster?

|  |  | Frequency | Percent |
| :--- | :--- | :---: | :---: |
| Valid | Yes | 912 | 45.6 |
|  | No | 1088 | 54.4 |
|  | Total | 2000 | 100.0 |

Q3. How concerned are you about climate change and the threat of potential climate disasters? Please use a scale from not at all concerned to five very concerned.

|  | Frequency | Percent |
| :---: | :---: | :---: |
| 1-Not at all concerned | 160 | 8.0 |
| 2-Not concerned | 128 | 6.4 |
| 3-Neither concerned nor not concerned | 107 | 5.4 |
| 4-Concerned | 692 | 34.6 |
| 5-Very concerned | 913 | 45.7 |
| Total | 2000 | 100.0 |

Q4a. Pre-Covid19 were you working at home for pay, at a location other than at your home or not working?

|  | Frequency | Percent |
| :--- | :---: | :---: |
| Home | 144 | 7.2 |
| Other than home | 1371 | 68.6 |
| Not working | 485 | 24.3 |
| Total | 2000 | 100.0 |

Q4b. And currently, do you work for pay at home, at a location other than your home or are you not working?

|  | Frequency | Percent |
| :--- | :---: | :---: |
| Home | 630 | 31.5 |
| Other than home | 772 | 38.6 |
| Not working | 598 | 29.9 |
| Total | 2000 | 100.0 |

THOSE WORKING OTHER THAN HOME WERE ASKED Q5 - Q8
Q5. Approximately how many kilometers is it <one way> from your home to your work destination?

|  | Frequency | Percent |
| :--- | :---: | :---: |
| Under 5 | 159 | 20.6 |
| $6-10$ | 297 | 38.5 |
| $11-20$ | 138 | 17.9 |
| $21-30$ | 69 | 8.9 |
| 30 or more | 109 | 14.1 |
| Total | 772 | 100.0 |

Q6. Before the COVID19 pandemic what method of

| transportation did you most often use to commute to work? |  |  |
| :--- | :---: | :---: |
|  | Frequency | Percent |
| Personal vehicle | 557 | 72.2 |
| Ride sharing | 67 | 8.7 |
| Public transit | 98 | 12.7 |
| Bicycle | 9 | 1.2 |
| Walking | 41 | 5.3 |
| Total | 772 | 100.0 |

Q7. After COVID19 and currently, what method of transportation do you most often use to commute to work?

|  | Frequency | Percent |
| :--- | :---: | :---: |
| Personal vehicle | 602 | 78.0 |
| Ride sharing | 33 | 4.3 |
| Public transit | 71 | 9.2 |
| Bicycle | 16 | 2.1 |
| Walking | 50 | 6.5 |
| Total | 772 | 100.0 |

## THOSE THAT CHANGED THE WAY THEY COMMUTE (Q6 \& Q7) WERE ASKED Q8

Q8. Can you tell me why you have changed the way that you commute to work?

|  |  |  |  | Frequency | Percent |
| :--- | :---: | :---: | :---: | :---: | :---: |
| COVID-19 health risk | 50 | 82.0 |  |  |  |
| Change of job | 5 | 8.2 |  |  |  |
| Economizing/saving money by reducing travel costs | 4 | 6.6 |  |  |  |
| Changes by employer to location of work at home | 2 | 3.3 |  |  |  |
| Total | 61 | 100.0 |  |  |  |

Q9. What are the most important locations, facilities, or services that you need to travel or commute to on a regular basis?

|  | Responses |  | Percent of Cases <br> (Total) |
| :--- | :---: | :---: | :---: |
|  | N | Percent |  |
| Childcare | 249 | $7.1 \%$ | $12.5 \%$ |
| Schools | 423 | $12.0 \%$ | $21.2 \%$ |
| Grocery stores | 1402 | $39.9 \%$ | $70.1 \%$ |
| Other commercial stores | 164 | $4.7 \%$ | $8.2 \%$ |
| Health \& long-term care facilities | 117 | $3.3 \%$ | $5.9 \%$ |
| Sports/recreational facilities | 315 | $9.0 \%$ | $15.8 \%$ |
| Green space | 61 | $1.7 \%$ | $3.1 \%$ |
| Work/office/facility | 772 | $22.0 \%$ | $38.6 \%$ |
| Place of worship | 14 | $0.4 \%$ | $0.7 \%$ |
| Total | 3517 | $100.0 \%$ |  |

Q10. When you consider how the federal government could act to reduce climate impact, what would be most important to you?

|  | Frequency | Percent |
| :--- | :---: | :---: |
| Regulations to reduce greenhouse gas emissions | 669 | 33.5 |
| Financial incentives to help make household more efficient (furnace \& air conditioning) | 311 | 15.6 |
| Financial incentives to help purchase more efficient appliances | 264 | 13.2 |
| Support for cleaner vehicles and fuel | 239 | 12.0 |
| Unsure | 222 | 11.1 |
| Support to design and produce clean technology | 199 | 10.0 |
| None / not needed | 49 | 2.5 |
| Support for more local farmers' markets and more local food stores | 24 | 1.2 |
| Support for childcare in my neighbourhood | 10 | .5 |
| Support for eldercare in my neighbourhood | 8 | .4 |
| Help restaurants and food stores reduce plastic packaging and other waste | 2000 | 100.0 |
| Total | 5 | .3 |

Q11. Are you aware of federal government programs to assist in reducing your climate footprint or impact?

|  | Frequency | Percent |
| :--- | :---: | :---: |
| Yes | 631 | 31.6 |
| No | 1369 | 68.5 |
| Total | 2000 | 100.0 |

Q12. In what area or for what purchase would government assistance be most helpful to you to help reduce your climate footprint or impact?

|  | Frequency | Percent |
| :--- | :---: | :---: |
| insulating and weatherproofing dwelling/home | 779 | 39.0 |
| furnace/air conditioner/air cleaners | 385 | 19.3 |
| food/groceries | 204 | 10.2 |
| personal or family automobile/vehicle | 142 | 7.1 |
| insulating and weatherproofing rental unit/home | 126 | 6.3 |
| Unsure | 126 | 6.3 |
| refrigerator/stove | 120 | 6.0 |
| washer/dryer | 63 | 3.2 |
| devices (laptops, iPad, phones, etc.) | 23 | 1.2 |
| None | 21 | 1.1 |
| bicycle | 11 | .6 |
| Total | 2000 | 100.0 |

Q13. Would you accept an increase in fossil fuel energy prices if the federal government provides adequate support to low income families and vulnerable small businesses to offset those increases?

| businesses to offset those increases? |  |  |
| :--- | :---: | :---: |
| Yes | Frequency | Percent |
| No | 1185 | 59.3 |
| Don't know | 737 | 36.9 |
| Total | 78 | 3.9 |

Q14. Do you consider yourself a climate voter or someone who votes on issues related to climate change?

| change? |  |  |  |
| :--- | :---: | :---: | :---: |
| Frequency | Percent |  |  |
| Yes | 835 | 41.8 |  |
| No | 1165 | 58.3 |  |
| Total | 2000 | 100.0 |  |

D1. Which of the following age groups may I place you in?

|  | Frequency | Percent |
| :--- | :---: | :---: |
| $18-34$ | 605 | 30.3 |
| $35-64$ | 1006 | 50.3 |
| $65 \&$ over | 389 | 19.5 |
| Total | 2000 | 100.0 |

D2. Into which of the following categories does your combined household income before taxes fall into?

| household income before taxes fall into? |  |  |
| :---: | :---: | :---: |
| Under \$50,000 | Frequency | Percent |
| $\$ 50,000-\$ 74,999$ | 497 | 24.9 |
| $\$ 75,000-\$ 99,999$ | 127 | 6.4 |
| \$100,000 \& over | 503 | 25.2 |
| Don't know / refused | 253 | 12.7 |
| Total | 620 | 31.0 |

D3. How many people under the age of 18 live at this residence?

|  | Frequency | Percent |
| :--- | :---: | :---: |
| One | 255 | 12.8 |
| Two | 286 | 14.3 |
| Three or more | 88 | 4.4 |
| None | 1371 | 68.6 |
| Total | 2000 | 100.0 |

D3. GENDER

|  | Frequency | Percent |
| :--- | :---: | :---: |
| Male | 961 | 48.1 |
| Female | 1039 | 52.0 |
| Total | 2000 | 100.0 |
